TECHNICAL SKILLS

- Front-End Development
- Back-End Development
- Cloud Programming
- Database Management
- AI Development

PROGRAMMING LANGUAGES AND TOOLS

- Node.js
- Python
- PostgreSQL / MySQL
- HTML & CSS
- Flutter
- Kotlin
- AWS

CORE WORK SKILLS

- Leadership
- Trainability
- Computational Thinking
- Problem Solving
- Teamwork Collaboration

PROFILE SUMMARY

A BSIT student at PHINMA University of Pangasinan, specializing in System Development, with strong proficiency in full-stack system development and database-driven systems. Passionate about building user-focused solutions and eager to apply technical skills to real-world projects through internships or entry-level roles.

EDUCATION

PHINMA University of Pangasinan (2023 - Present)
Bachelor of Science in Information Technology

Major Projects

My Crew Manager

Django | AI | Typescript | PostgreSQL | Flutter
Final Junior Project (3rd Year).

MyCrewManager is an intelligent project management suite built to enhance agile workflows. I worked as a Backend Developer, contributing to a Django-based backend that powers the platform's core features, including the AI Project Architect for automated plan, task, role, and backlog generation from uploaded proposals. The system supports Flutter-based mobile access and a JavaScript/TypeScript web interface.

Fitness Club Management System

Kotlin | PHP | JavaScript | MySQL | HTML & CSS
Final Sophomore Project (2nd Year).

I served as a full-stack developer, building a mobile and web-based gym management system using Kotlin, PHP, JavaScript, MySQL, HTML, and CSS. The application handled memberships, bookings, payments, user authentication, and QR code check-ins, with RESTful PHP APIs, Retrofit for mobile communication, and a responsive admin dashboard for gym management.

Library Management System (LMS)

Java | Laravel | MySQL
Final Sophomore Project (2nd Year).

I worked as an Android Developer on a digital library management system built with Java, Laravel, and MySQL. The application streamlined book borrowing, tracking, and user management, with core Android functionalities implemented alongside Retrofit-based API communication and a user-friendly interface for seamless library access.

OTHER SCHOOL PROJECTS

Flixrecos

Final Freshman Project

2023

Java | CSS | Netbeans

Role: Lead Developer / Full Stack Developer

Chambers of Forsaken

Point and Click Visual Novel RPG

Freshman Project

2023

Python | Renpy

Role: Full Stack Developer
